# Patient Education: Krames

Krames will automatically search for education materials tailored to the patient based on the ICD-9 codes in the progress notes.

To find additional materials, delete the ICD-9 codes from the "Billing Code" field, type into the "Word Search" field and/or select Age & Gender preferences. Scroll to the bottom and click "Search". If you don't get many results, try changing the radio button from "ALL of my search terms" to a different option.

To preview the material and check to see what languages it's available in, click on the blue title to open it.

Select Print Now.

The screenshot displays the eClinicalWorks software interface. At the top, there is a navigation bar with menu items like File, Patient, Schedule, EMR, Billing, Reports, CCD, Fax, ePayment, Tools, Community, Meaningful Use, Lock, and Help. Below this is the eClinicalWorks logo and a status bar showing various system indicators. The main content area is titled "Progress Notes" and shows a patient record for "TEST, LAB, 11Y 9M, M". A "Patient Education" window is open, displaying search results for the ICD-9 code V70.5, 250.02. The search results are categorized into "Exact matches" and "Other matches". Under "Exact matches", there is an "Exit-Writer™" section with a checkbox for "JAIL CLEARANCE" and a "Lab Tests" section with a checkbox for "Comprehensive Metabolic Panel". Under "Other matches", there is another "Exit-Writer™" section with a checked checkbox for "DIABETES™, General Info" and several other options like "DIABETIC FOOT CARE", "HYPOGLYCEMIA, Oral Diabetic Medicine", "MEDICAL CLEARANCE FOR PSYCH ADMISSION", "MEDICAL SCREENING EXAM, NonUrgent", and "NORMAL EXAM, (Child) (Adult)". The interface also includes a sidebar with user avatars and a bottom toolbar with buttons for Print, Fax, Record, Lock, Details, Scan, Templates, Claim, Letters, and Ink.

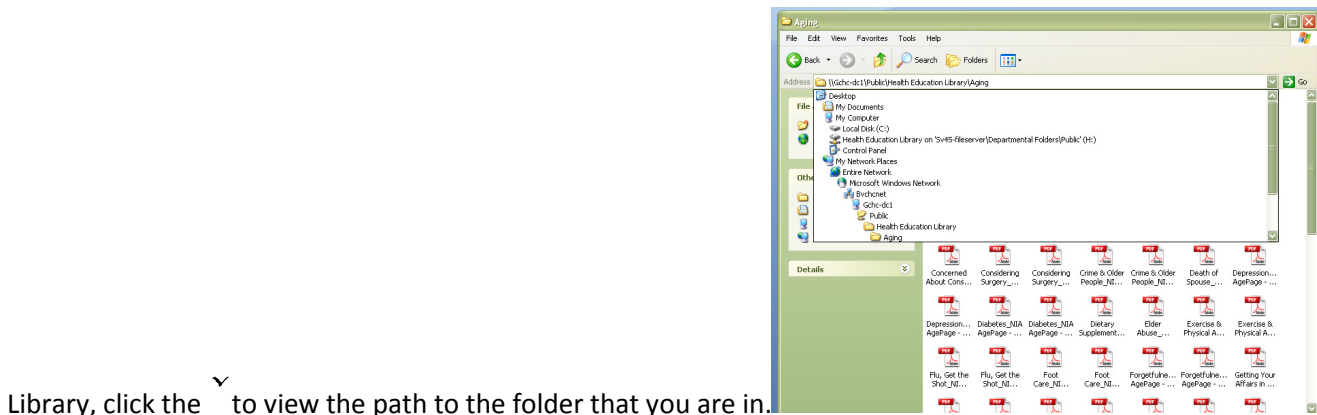

## Instructions for using Custom Patient Education materials

Please follow these instructions the first time you access Custom Patient Education from each computer. Once the folder has been accessed and a file has been opened on that computer (through anyone's eCW account), it will automatically go back to the same folder each time. Most computers in Bryan CHC, ABC, and Grimes County CHC have already been set up to point to their respective Custom Patient Education folders.

Step 1: From "progress notes" (use a test patient if you are only setting it up), click "treatment". Click the

This will cause the navigation window to open. If you're unsure whether you are already within the Health Education

**If you are not in the Health Education Library folder, follow the steps below.**

Type the location (or copy from this document and paste) of your clinic's Health Education Library, listed below, into the "File name:" field.
